

(1)

1001. - Periy Sea,

May 1. 1882 - Deck of vessel after a gale.

1005 - Copper Island, May 6. 1882 - Beach

1006. - Copper Island, May 6. 1882. - Beach

*Muraenoides
ornatus* Gisl.

1028. - Periy Island, May 10. 1882. - Color brownish
olive.

1029. - Periy Island, May 10. 1882. - Color olive
brown with darker and lighter
spots. On the lower jaw several
transverse light, dark bordered
stripes.

1050. - Periy Island, May 15. 1882. - Color olive
brown with minute black spots;
belly yellowish; a white line
runs from the lower border of the
nostrils, below the eyes, backwards
to the posterior margin of the oper-
culum in the direction of the
pectoral fin.

Liparis calyodon 1124 - Periy Island, May 30. 1882. - Beach

✓ *uraeoides*
ornatus Girard.

1125.- Perry Island, May 30th 1882.- Beach.

1126.- Perry Island, May 30th 1882.- Beach.

1228.- Copper Island, June 23, 1882.- Beach.

1272.- Perry Island, Saranua Lake, July 17 1882.
Gasterosteus microcephalus

1273.- Perry Island, small freshwater pond in
Gasterosteus pumy. brachypoda
Gavanskaya ~~Swamp~~ Swamp, July 20 1882.

1274.- Perry Island, ~~Gavanskaya~~ ^{Gavanskaya} Reschika, June
1882.- The natives were somewhat
doubtful as to the name. Some
called it a "Pajdarsik", others
again ^{"Kisutch"} "drugoj sort", i.e. another
kind of Kisutch. The Aleutian name
was given as "Tukut-shipscha".

1337.- Perry Island, July 28. 1882.- Fresh-
Gasterosteus
microcephalus water pond behind the new cemetery.

1417. - Bering Island, Gavanskaja Reshetka,
August 11. 1882. - Silvery; green with
small black spots on the back.

Was given ^{by the natives} as *tundrubt'id*
"Najdaroch". The Aleutian name
was said to be "Tukukh", or
in order to distinguish it from
(no 1485) "Tschikanakh
Tukukh", i. e. River-Tukukh.

1463. - Bering Island, August 14. 1882. - Black.
Color purplish black, with cream
colored figures.

1464. - Bering Island, August 14. 1882. - Black
Cottus niger
Iris silvery alternating with violet
red.

1485. - Bering Island, August 20. 1882. - Russian
name "Morskoi Okun"; Aleut name
"Magon Tukukh".

1512.- Perry Island, September 3. 1882.- [Call]

1513.- Copper Island, May 6. 1882.

1554-59.- Perry Island, Saranna Reschka,
September 9. 1882. [54 and 59 in stock, [unclear]]
"Pajdarsik".

1560-62.- Perry Island, Saranna Thelita, Sept
9. 1882 [60 x 61 in stock, 62 in stock] "Golets".

1630.- Perry Island, ~~September~~ September 12. 1882.

Liparis calliodon (Call) 1662.- Perry Island, September 23. 1882.- Color
yellowish olive above, whitish
beneath. - Dead.

1663.- Perry Island, September 28, 1882. - Dead

1668.- Perry Island, September 1882. - [unclear]

1669.- Perry Island, Saranna Thelita, September

Pleurogrammus monop.
"Atka mackerel."
J. H. B.

30. 1882. Color [unclear] Called by.

the natives "Sudak", the Russian name
of Luciperca sandra (L.) -

Is rather common at Copper Island
where it is extensively used for food. At
Bering Island it is said to be rather
scarce.

1670 x 71 10 20 in each.

Gadus morhua 1681.. Bering Island, October 10. 1882. -
Color silver.

1705.- Bering Island, November 1. 1882. Color silver.

1706, '7 and '8.- Bering Island, November 3. 1882..

Cast ashore. - Color silvery; back green
iridescent at the border of the silvery
white of the lower surface; on top
of head a golden yellowish spot.

1748.. Bering Island, November 26, 1882. - From
the gullet of Larus canus.

1775.- Perry Island, December 2. 1882.-

Colored similarly to no 1705,
only that the red color is more
extended and the brown more
restricted. I have seen them
red almost all over.

1815.- Perry Island, December 23. 1882.- Color

dark olive gray with irregular
lighter mottlings. Belly and
sides of belly with large oblong
whitish spots. Pectorals dusky
colored with one perfect and two
imperfect yellowish bands; abdominals
whitish with ~~one perfect~~ and
two ~~imperfect~~ broad and distinct
blackish cross-bands and a
fainter and narrower one at the
base.

1902.- Perry Island, February¹⁰ 1883.- Dead on

beach.- Horn olive gray, below

7

whitish, sides with a gloss of brass.

1903-'4. - do do. Febr. 11. 1883.

1921. - Perry Island, February 20. 1883. - Black
Color purplish blackish brown
with bluish white spots on
anals and sides of lower jaw.

1946. - Perry Island, March 11. 1883. - Color
purplish blackish brown.

1947. - Perry Island, March 12. 1883. - From
Stomach of a Gadus morhua.

1948. - Perry Island, March 12. 1883. - From
Stomach of a Gadus morhua

1949. - Perry Island, March 13. 1883. - Color
olive. *G. morhua*

1950. - Perry Island, March 13. 1883.

1955.- Perry Island, March 14. 1883.-

Found dead above. - Silver-colored
with black spots.

1968.- Perry Island, April 10. 1883.- This

silver-colored with faint pinkish
reflex. Color silver-white with
a faint gloss of brass above;
spots blackish. - Alut name
"Anamukto". - Rather common
at that time.

2012.- Perry Island, May 7 1883. - This
is the "Mjakinika^{aja} Riba" or "Mja-
kina", i. e. soft fish. - The

Cycloptorichthys
ventricornis
J. H. B.

first one of this spring (1883) were
taken on March 21st, ~~and~~
and were afterwards found in
great number on the beach up
to the middle of May when they
again disappear. In the beginning
the natives eat them with great
 gusto but soon get tired of them

and are then only used for food for
the Hedge-dogs. Mr. Volokitin informed
me, that the same species occurs, but
much more scarce, at ~~Atta~~^{Atka}, on which
island he was born.
